

# WHAT RETAILERS ARE DEMANDING FROM SD-WAN

Networks are growing more complex to administer and more difficult to manage. Not all SD-WANs are equal and it is not a simple off-the-shelf purchase. Here are some interesting facts about what matters most to retailers implementing SD-WAN to cope with the changing business conditions of 2020.

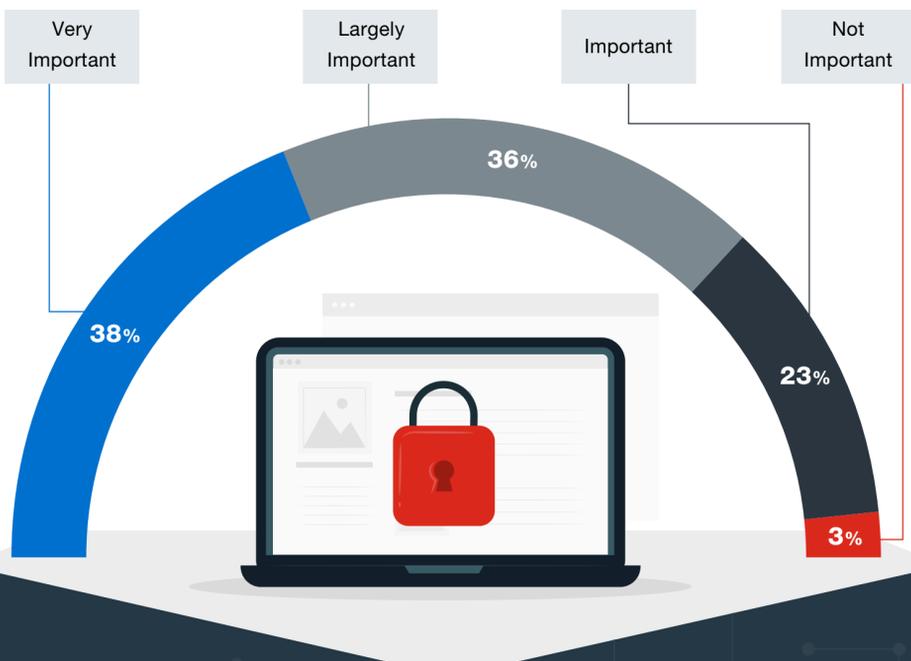

## SD-WAN IS SOLVING A RANGE OF ISSUES

If you are deploying or have deployed an SD-WAN solution, what are the primary reasons for doing so?

## CYBERSECURITY PLAYS A KEY ROLE IN SD-WAN DECISIONS

If you chose to deploy an SD-WAN solution, rank the importance of security in choosing an SD-WAN solution.

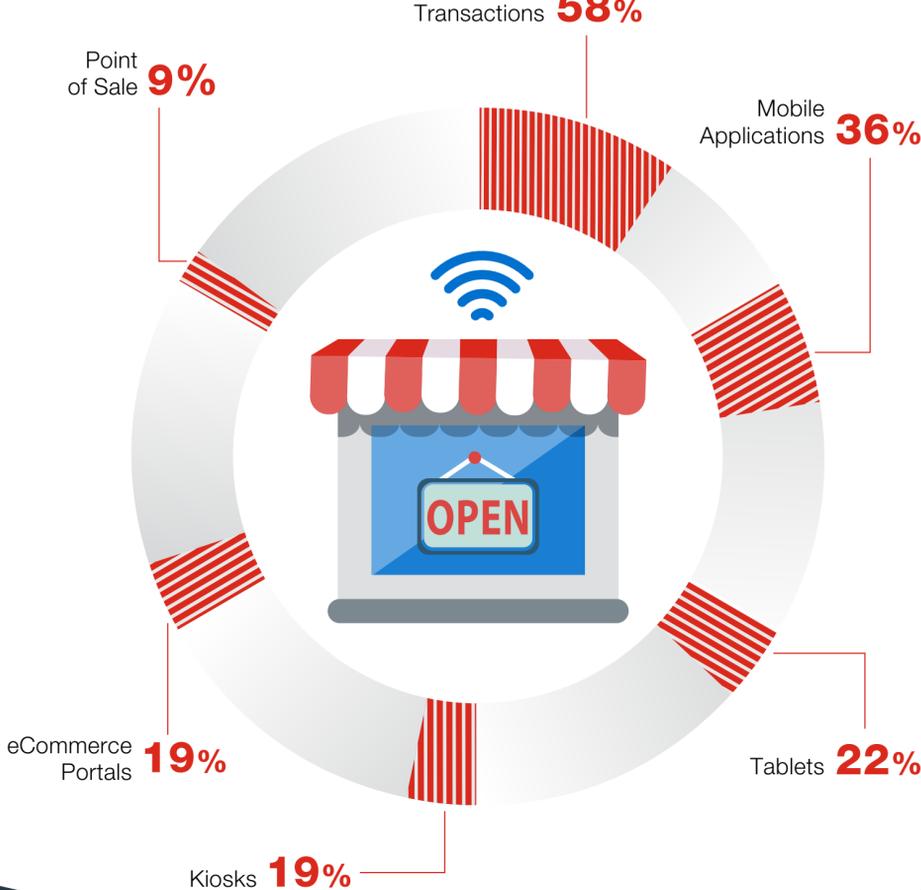

## THE FOCUS FOR THE FUTURE WILL BE ON THE NETWORK

In the next 12-18 months, what will your organization focus on to achieve or improve security?

## RETAILERS ARE DEPLOYING SD-WAN TO HELP ROLL OUT NEW SERVICES

What new technologies have been adopted to service customers due to COVID-19?

## RETAILERS FEEL THEY CAN ADAPT YET STAY SECURE

Rank how confident you are in your PCI DSS compliance for newly-implemented sales channels?

Find out more about how HughesON™ and Fortinet provide and protect the network

### About Fortinet

Fortinet provides retailers with top-rated cybersecurity solutions covering the expanding attack surface. Advantages include centralized visibility and management, lower TCO, and top performance. Proven threat protection and seamless Fabric integration deliver better, faster response to attacks.

### About HughesON™

Hughes connects technologies, people, and locations. We are more than just a global network solutions provider – we are a true business partner. Our HughesON™ suite of Managed Services enables businesses to transform and meet the expanding needs of employees and customers. Our relationship with Fortinet spans over 14 years. We simplify IT by delivering a fully managed, turn-key and integrated SD-WAN solution designed for unique business needs. Our tailored, best-fit SD-WAN solution is refined at every level of the underlay, overlay, and security. Hughes focuses on services that are agile, scalable, and secure, delivering optimal application performance, all to ensure that an organization is positioned for success. So go ahead and ramp up cloud usage and deploy new technology, because with Hughes Managed Secure SD-WAN, your network is ready for whatever comes next.
