

Hughes Breakroom TV™

Did you know that 70% of companies will admit that they have a significant engagement and retention problem?

In distributed organizations, employees are often spread across multiple geographies, leaving them feeling isolated, and potentially leading to negative perceptions and disloyalty. But it does not have to be that way. By using digital communication tools, you can better engage and enhance employees to become loyal brand ambassadors.

Hughes Breakroom TV is designed to make the breakroom more enjoyable, productive, and informative through live television programming wrapped with important company information, news, weather, and social media feeds.

With Breakroom TV, you can:

- Increase employee satisfaction with live TV wrapped with organizational and local news and messaging
- Easily change messages by time-of-day, shift, demographics, or seasonal patterns
- Drive pride in performance by displaying Key Performance Indicators (KPIs) on screen
- Create and build loyalty by bringing corporate presence to the local store

Solution includes:

- HD flat screen television and Hughes media player
- Optional Slingbox video integrator
- Content hosting and distribution
- Professional installation and field maintenance options
- Support options

Features and Benefits:

- Easy-to-use management interface
- Site by site customized social and news tickers
- Easy-to-use/setup Web management interface
- Centralized playlist creation/management
- Live HDTV integrated stream (optional)
- Multiple graphic/video files support
- Emergency alerts
- Flexible screen layouts
- Time-of-day content scheduling
- Multiple panel display support
- Simple and easy content uploading and publishing
- Robust report generation and export

HughesON™

HughesON is a suite of innovative, Cloud-ready network and digital media solutions designed for the unique needs of distributed enterprises in industries such as retail, hospitality, and retail petroleum.

Frequently Asked Questions

What types of content and printers are supported?

Breakroom TV accepts HDTV video streams, .mp4, .mov, .flv, and .avi video files, and .jpg, .png, and .gif image formats. The system will also display .swf widgets, RSS, and social media feeds, as well as display Web pages as part of the multiple-panel display.

How do I manage the players and content?

Hughes Breakroom TV is managed using nothing more than a standard Web browser. The content administrator logs into the admin page and has visibility into the entire distributed network. Content can be injected, scheduled, and managed from one Web interface. The admin can also see what players are connected, the content being entered by individual sites and the health/status of any player in real time.

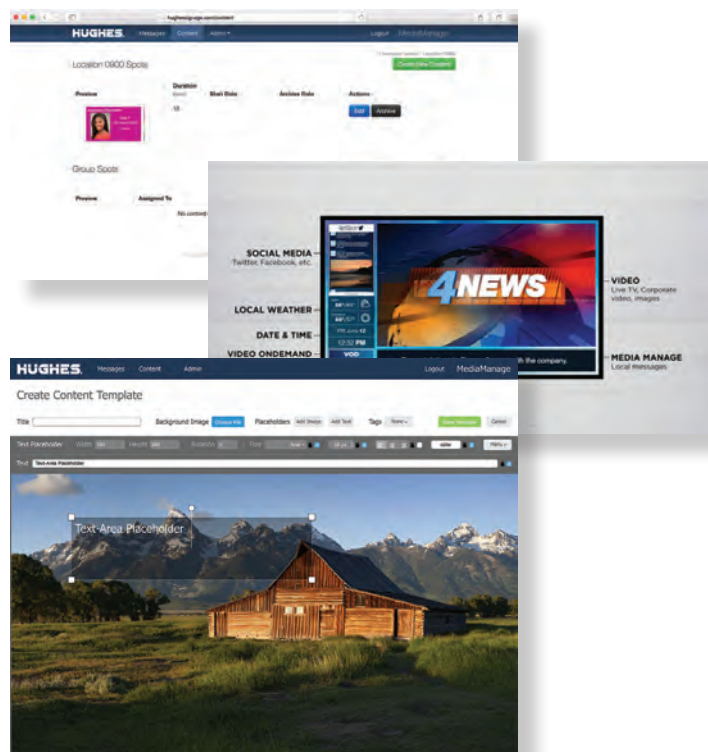

Can I allow local content insertion and still maintain overall control?

Hughes Breakroom TV allows for local content place holders within the overall platform. This enables individual site managers to upload relevant, local content to be displayed in a specific panel. The content administrator retains control over when/where the local content is displayed.

What kind of customer support is provided?

Depending on preference, Hughes can provide 24/7/365 telephone support. Hughes also provides optional onsite field maintenance services that can be purchased.

Organizations are quickly learning that Hughes Breakroom TV is an effective, easy-to-set-up and use, fun way for employees to consume relevant information. The result is happy, better informed employees who are better prepared to improve the customer/shopper experience, becoming loyal brand ambassadors.

About Hughes

Hughes Network Systems, LLC (HUGHES) is the global leader in broadband satellite technology and services for home and office. Its flagship high-speed satellite Internet service is HughesNet®, the world's largest satellite network with over 1.2 million residential and business customers across the Americas. For large enterprises and governments, the company's HughesON™ managed network services provide complete connectivity solutions employing an optimized mix of satellite and terrestrial technologies. The JUPITER™ System is the world's most widely deployed High-Throughput Satellite (HTS) platform, operating on more than 20 satellites by leading service providers, delivering a wide range of broadband enterprise, mobility and cellular backhaul applications. To date, Hughes has shipped over 7 million terminals to customers in over 100 countries, representing approximately 50 percent market share, and its technology is powering broadband services to aircraft around the world.

Headquartered outside Washington, D.C., in Germantown, Maryland, USA, Hughes operates sales and support offices worldwide, and is a wholly owned subsidiary of EchoStar® Corporation (NASDAQ: SATS), a premier global provider of satellite operations.
